What is Go Wise power inverter?

Go WISE power inverter is an advanced tool of power conversion. It can supply you with AC power converted from a DC power source. It can be used in cars, vessels, during camping and in power failure emergencies. Pure Sine inverters are a stable power source with 1500W continuous power and 3000W surge power with low harmonic distortion.

Can a 555 inverter output 50 watts?

Capable of outputting 50 watts total with just a few components. This is an IC 555 inverter circuit. Because of using the 555 TIMER and MOSFET as main. I experiment with it to work well. When using a 12V battery as a source, it will output 220V AC 50Hz Why use MOSFET?

We think most people do not like reading a long yet tedious explanation.

What is a power inverter used for?

This inverter is an excellent tool to use during power failure emergencies and guarantees maximum efficiency with computers, sensitive equipment and more. Compact and portable, this inverter can be used on worksites, boats, cars, camping or for permanent use.
