# **1000 wh power station factory in Namibia**

## Overview

---

Who can develop small power generation facilities in Namibia?

Parties interested in developing small power generation facilities may also look to some of Namibia's Regional Energy Distributors (REDs). Some REDs are looking to develop their own – albeit limited – generation capacity. Partnering with a RED familiar with the ECB's IPP framework might result in faster project implementation.

Who built NamPower power plant?

The plant was built by InnoSun, a French-Namibian company which specializes in renewable energy. It was also the first local IPP with which NamPower signed a power purchasing agreement.

Does Namibia have a solar power plant?

The government, the ECB, and NamPower have all expressed interest in grid-connected solar and wind renewable solutions, and in May 2015, Namibia inaugurated its first-ever solar power plant – a 4.5 MW plant – which represents one percent of the country's current production of energy.

How much power does Namibia need?

Peak demand is over 600 MW. Namibia has long relied on imported power from South Africa (Eskom) and other neighboring countries, but South Africa's own economy has put strains on its domestic electricity generation capability and thus its ability to export. Namibia has a power purchase agreement with Eskom which expires in 2025.

## 1000 wh power station factory in Namibia

### Probenergy Mega 1000W Lithium Power ...

A stylish black and dark grey finish. »  
LED Work Light, High ...

## ENERGY SECTOR

Ruacana Hydropower Station - 332 MW  
Van Eck Coal Power Station - 108 MW
