Overview

ExelTechs 125 watt pure sine wave power inverter has the ability to exceed power rating under proper conditions. Clean DC to AC power with safety features!.

What is a sinewave inverter?

A sinewave inverter is a device that converts DC power (such as from batteries or accumulators) into alternating current (typically 220 volts 50 Hz sine or corrected). In simpler terms, it converts direct current into alternating current. Our common emergency power supply often uses a DC battery to produce 220V AC through the use of a sinewave inverter.
