# 12V inverter power outage

✓ LIQUID/AIR COOLING

✓ ON GRID/HYBRID

✓ PROTECTION IP54/IP55

✓ BATTERY /6000 CYCLES

## Overview

---

Which inverter is best for a power outage?

The most common inverter sold for emergency home backup power during a power outage is a 1750 watt. This inverter is perfect for most vehicles and will run most appliances. Ok, now that we got that out of the way we can start sizing an inverter that is going to work well during a power outage.

Can you use an inverter for emergency back-up power?

Yes, you can use an inverter for emergency home backup power. One way is to have two 12-volt batteries hooked in parallel and one inverter, which will provide enough power to run a refrigerator off and on for a few days depending on the size of the batteries.

Do inverters have problems?

However, inverters and battery can develop issues over time, like any other electrical device. Some problems are minor and easily fixed, while others may require professional assistance. In this guide, we'll cover the most common inverter issues, their causes, and how to fix them effectively.

Will an inverter work if the car is turned off?

An inverter will still work if the car is off, but it will function best if the vehicle is running. This information pertains to using an inverter for emergencies with a vehicle. When using an inverter for emergency back-up power in a home without a vehicle, there are alternative methods.

## 12V inverter power outage
