16 8V outdoor inverter

Overview

What is a solar inverter used for?

This Inverter is very suitable for solar power systems, wind power generation systems, wind and solar hybrid generation systems. The inverter can supply AC power to all kinds of electric equipment, air conditioners, electric motors, refrigerators, fluorescent lights, televisions, electric fans and other industrial power supply.

What is SI21 solar pump inverter?

The SI21 solar pump inverter can be used to provide clean water resources in remote areas where power facilities are scarce; the controller can convert the direct current of the . VEICHI provides OEM/ODM Service for TOP Customers. AC 70T hoisting special frequency converter is specially designed for hoisting industry applications.

What is the input voltage range for solar/wind system?

Input voltage range can be selected from 100-300V, 200-500V or 500-850V, suitable for solar/wind system without backup batteries, it can save many cost and maximization use the solar/wind energy. 11, Using SVPWM space vector algorithms, high conversion efficiency, high instantaneous power and low losses conversion efficiency up to 94%.

What are the advantages of the inverter?

INVERTER technology - for sensitive devices (computers, etc.) ideal for the garden area as well as leisure and camping activities closed body and thus quieter convenient transport thanks to extendable handle and transport .
