21700 Automatic sorting of battery cells

Overview

Description: The automatic battery sorter is a equipment for 18650 21700 battery cell sorting, through manual loading and simple settings, the battery sorting process can be completed.What is 11 channel automatic battery cell sorting machine?

11 Channels Automatic Battery Voltage and Resistance Sorting Machine
Battery cell sorting machine is a must equipment for Battery Pack Manufacturer for voltage and resistance testing and sorting. 11 Channel automatic cell sorter is designed to sort cylindrical 18650, 21700, 26650, 32700 cells.

What is a battery cell sorter?

Battery cell sorting machine is a must equipment for Battery Pack Manufacturer for voltage and resistance testing and sorting. 11 Channel automatic cell sorter is designed to sort cylindrical 18650, 21700, 26650, 32700 cells. * Touch screen operation, simple and fast response.

What is 11 channel automatic cell sorter?

11 Channel automatic cell sorter is designed to sort cylindrical 18650, 21700, 26650, 32700 cells. * Touch screen operation, simple and fast response. 10 sorting & matching group channels, 1 unqualified product channel, available arbitrary set for each channel's sorting value.

How many cells are in a single 21700 battery?

A single 21700 battery contains 4416 cells, as seen in the Model 3/Y Long-Range battery pack. The battery pack consists of 4 modules, with each module containing 46 cells.
