220v circuit breaker in China in America

Overview

Who is the largest circuit breaker manufacturer in China?

As a largest Circuit Breaker manufacturers in china, Korlen electrical produces Circuit Breaker more than 3 million monthly. .

Why did China use 220V?

Given China's historical context of low productivity and economic constraints, choosing 220V helped minimize losses and reduce the consumption of copper and other metals. In 1901, Shanghai began using 200V for public power supply, and in 1930, China established 220V as its standard voltage.

Will a 220V appliance work in a 110V country?

If you take a 220V appliance to a 110V country, it may not work properly, if at all. However, many international brands now design appliances to accommodate a range of voltages, from 110V to 240V. If you travel often, it's advisable to carry travel adapters and converters.

Why did China not adopt 110V?

So, why didn't China adopt 110V?

When the U.S. adopted 110V, European countries found it too low, resulting in significant losses during transmission. They promoted 220V, which became the standard for most countries.
