Overview

Can I use an external battery cabinet with a ups?

External battery cabinets cannot be used in combination with a UPS containing internal batteries. The UPS must be supplied without internal batteries. The EBC is designed to be installed in a line-up-and-match or standalone configurations.

How many batteries are in a 9355 20-30 kVA ups?

The total battery string voltage in a 9355 20-30 kVA UPS is 216V (18 batteries, where is each battery is 12V nominal). Two strings fit in each battery shelf of the 9355 20-30 kVA UPS. The two-row tray configuration that is being replaced holds 18 batteries, connected to make one circuit.

Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet. See Figure 1-2 and Figure 1-3 for line-up-and-match configuration views. Contains two or three battery strings to be used with the 93E 30 kVA UPS.

How many Battery strings can a 93e 30 kVA ups have?

Contains two or three battery strings to be used with the 93E 30 kVA UPS. Up to two EBCs with a total of four or six battery strings can be paralleled together to extend the run time. To configure a 30EBC battery system with four strings, two 30EBCs, each with two strings, must be used.
