80kW PV combiner box

Overview

What is a solar combiner box?

A PV combiner box combines multiple strings of solar panels into one main output circuit. It's essential for any solar installation with multiple strings as it provides overcurrent protection, surge protection, and circuit isolation, ensuring the safety and efficiency of your solar system. How do I know which voltage level to choose?

What is a PV combiner box?

In every photovoltaic (PV) system, stable power generation relies on more than panels and inverters. Hidden behind the scenes is a critical piece of equipment: the PV combiner box. Though easy to overlook, this device plays a decisive role in current collection, circuit safety, surge protection, and intelligent monitoring.

What size PV combiner box do I Need?

The size of the combiner box depends on the number of PV strings and the current and voltage ratings. Calculate the total input current and voltage to ensure the box can handle the load safely and efficiently. Choosing the right size PV combiner box is one of the most important decisions in designing a solar power system.

What is a 1500V DC combiner box?

ETEK Solar's 1500V DC combiner box is a high-quality solution designed for utility-scale solar power plants. Equipped with a 1500V DC disconnector or molded case circuit breaker, PV fuses and Type 2 PV surge protector, it provides comprehensive overcurrent and overvoltage protection to ensure efficiency and reliability in high-power applications.
