How much space does a 9kw Solar System need?

A 9kW solar kit requires up to 670 square feet of space. 9kW or 9 kilowatts is 9,000 watts of DC direct current power. This could produce an estimated 1,200 kilowatt hours (kWh) of alternating current (AC) power per month, assuming at least 5 sun hours per day with the solar array facing South.

Is Sol-Ark 8K a good inverter?

Even though the Sol-Ark 8K has good continuous Grid Tie power, we doubled component values for 20KW peak Off Grid power! The 20KW power was expensive, but it improves long term reliability and cooling of the system. Sol-Ark 8K Inverter Efficiency Tops Tesla.
