# **ASEAN Power Grid solar container battery**

## Overview

---

What is the future of ASEAN Power Grid?

A key part of that future is the ASEAN Power Grid, which featured prominently at the recent 46th ASEAN Summit. Leading energy firms from Singapore, Vietnam, and Malaysia have launched a new renewable energy consortium to promote tripartite collaboration and cross-border clean energy trade.

What is the ASEAN Power Grid (APG)?

Ensuring a secure and stable electricity supply is critical, and the ASEAN Power Grid (APG) aims to achieve this through regional energy integration, enhanced grid infrastructure, and a unified power market.

Does Southeast Asia need a power grid?

In Southeast Asia, the situation isn't just a climate crisis; it's an energy crisis. The region needs modern, more resilient grids to power a low-carbon, inclusive future. A key part of that future is the ASEAN Power Grid, which featured prominently at the recent 46th ASEAN Summit.

How will the ASEAN grid vision be realised?

Realising the ASEAN grid vision will require more than just infrastructure and finance. Extreme weather is intensifying across the globe. The year 2024 marked the hottest year on record, and according to NASA, floods and droughts are becoming more frequent, prolonged, and severe.
