**ASEAN energy storage batteries  
are maintenance-free**

## Overview

---

Does Singapore have a battery energy storage system?

Of the 11 ASEAN members, Singapore is taking the lead in the battery energy storage systems (BESS) space. Earlier this year, the city-state launched the region's largest battery energy storage system (BESS).

Will battery energy storage reshape Asia?

Southeast Asia is shifting from the sidelines of battery storage to the centre of a global energy transition. It is on the brink of a battery energy storage (BESS) leap that could reshape its energy systems. The region's market is valued at around USD 3.5 billion in 2024 and is projected to approach USD 5 billion by 2030, expanding at 6 % CAGR.

Does ASEAN need energy storage?

The ASEAN bloc has set the targets of 23% renewable energy in its Total Primary Energy Supply (TPES) and 35% renewable energy in ASEAN installed power capacity by 2025. This means that energy storage is required. Additionally, without BESS acceptance on a larger level, the needed funds won't materialise, and fewer BESS will be built.

What is a battery energy storage system?

A battery energy storage system is a power station that uses batteries to store excess energy. A BESS is a potential unsung hero in the world's efforts to pivot to more renewable energy sources in the power sector.

## ASEAN energy storage batteries are maintenance-free

---

### [LS4]

The ATF SG hosted the fourth learning session for 2025 on 5 June via Zoom, focusing on the development of integrated battery energy storage systems (BESS) and ...
