Advantages of battery cabinets over battery racks

Overview

Why do we need a battery cabinet & rack?

Physical observation of a battery is key in the maintenance of batteries in string and in avoiding undue incidents. The battery cabinets and racks make this task easy by having an orderly arrangement of batteries. Concerning maintenance, the proactive approach reaps rich benefits over a reactive measure.

Are battery units rack-mounted or cabinet-mounted?

Based on the size, the batteries are rack-mounted if they are above 100 AH and used in cabinets if they are below that level. The number of battery units and the respective size of the battery determines rack or cabinet usage.

Why should a battery rack be tiered?

Further tiers in racks can help accommodate more batteries in lesser space but pose high risks for increased numbers of batteries. The top clearance factor is often overlooked in cabinets, rendering access to the last battery difficult for the technician.

Do battery cabinets need to be locked?

Battery cabinets must enclose the batteries behind locked doors accessible only to authorized personnel. As long as the cabinets are kept locked, they can be located in a computer room or other rooms accessible by non-battery technicians.
