Overview

Can Angola develop a photovoltaic solar energy industrial chain?

Sonangol, Angola's state oil company, has signed a memorandum of understanding with the Chinese firm Qinghai Lihao Clean Energy to establish a partnership aimed at developing a photovoltaic solar energy industrial chain in Angola. The agreement focuses on the production of solar panels using locally sourced quartz ore as the primary raw material.

Can Angola become a regional hub for solar production?

Lihao currently operates 150,000 tons of high-purity polysilicon capacity in China, reflecting its robust production expertise. Future Implications: Should the project proceed as planned, Angola could become a regional hub for solar manufacturing, reducing dependency on imported solar materials.

What is Lihao solar project?

This project is intended to produce critical solar panel materials and uses local quartz ore to produce metallurgical silicon and PV-grade polysilicon. Lihao aims to bring its expertise to Angola to create an entire solar PV industry chain.

Can Angola build a polysilicon plant?

Key Figures & Findings: In a significant step toward clean energy, Angola's state-owned National Petroleum Company, Sonangol, has signed an agreement with Chinese firm Qinghai Lihao Clean Energy, a company specializing in producing and selling semiconductor materials to build a polysilicon plant.
