# **Appia Weather Station uses a 200kW collapsible container**

## Overview

---

What is automated weather station?

Vaisala's automatic weather stations, automated weather station, automatic weather station enable secure, and integrated network architecture, that makes modern observation networks easy to create, manage and maintain. Weather stations, automated weather station, automatic weather station.

What is the Vaisala automatic weather station aws810?

The Vaisala Automatic Weather Station AWS810 enables modern, high-quality surface weather observation networks anywhere in the world. AWS810 is a generational leap in the industry, enabling first-class surface weather observations, future readiness, plus a modern, secure, and integrated network architecture.

What is Vaisala automatic weather station aws310 & bws500?

Vaisala Automatic Weather Station AWS310 is a complete communication and weather observation solution that can be used as a standalone unit, or as part of a weather observation network. The powerful, compact Vaisala Beam Weather Station BWS500 provides a unique combination of weather and environmental insights for a variety of applications.

Are remote weather stations interchangeable?

Both portable and 'very portable' remote automatic weather stations are available for temporary field use, and such stations are being developed further (Warren 1987a,b). These units employ the same sensors, electronics, measurement routines, and communications options as the standard RAWS; components are, thus, interchangeable.
