Overview

What is the Kingston solar project?

The Kingston Solar Project was successfully completed ahead of both schedule and budget; and began operations in 2015. Its construction incorporated locally made components and employed hundreds of workers from across Ontario. The facilities now produces enough clean energy to meet the needs of approximately 20,000 households.

How much electricity does Kingston generate a year?

Kingston's nine units boast a summer net capability of 1,398 megawatts. It can generate approximately 10 billion kilowatt-hours a year — enough electricity to power approximately 817,830 homes. To meet the demand, Kingston burns about 14,000 tons of coal a day, an amount that would fill 140 railroad cars.

What is Canada's largest solar farm?

One of Canada's largest solar farm generates 100 MW of renewable energy, enough to power 17,000 households. In collaboration with H.B. White Canada Corp., CIMA+ developed a 100 MWAC photovoltaic project located near Kingston, Ontario.

Are there many new energy solar sites in Kingston
