Asmara Solar Lighting System Installation

 **TAX FREE**    

ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

Overview

How to install a solar street lighting system?

The first step in installing a solar street lighting system is to prepare the site. Check the area to ensure that the location is suitable for installing a solar street lighting system. The following conditions should be met:.

How do you attach a light fixture to a solar panel?

Attaching Light to Pole Secure the light fixture onto the pole using the manufacturer-supplied bolts and tools. **Solar Panel Orientation** Adjust the solar panel to face true south (in the northern hemisphere) or true north (in the southern hemisphere) to maximize sunlight capture.

How long does it take to install a solar system?

All-in-one models typically take 1 to 2 hours to install, while split-type systems may take 3 to 5 hours. Q2: Do I need an electrician for the installation?

.

How do you connect a solar panel to a lamp head?

Connect the lamp head to the controller. Connect the battery to the controller. Connect the solar panel to the controller. If the lamp head lights up when connected to the battery, and goes out when the solar panel is connected, it means that the wiring is correct and all components are functioning properly.
