BLCD Solar Water Pump

Overview

What is a BLDC solar water pump?

The beauty of using photovoltaic (PV) panels and a BLDC solar water pump is you get water delivery when you tend to need it most when the sun is shining full blast! A solar water pumping system is ideal in remote locations where there is uneven or no grid electricity availability.

How BLDC solar pump works?

BLDC solar pump works in low radiance also. It starts early in morning and continues to work till late in the evening. BLDC pump works efficiently than normal AC motor and gives more water output. Jain Irrigation Systems Ltd. is top manufacturer of solar BLDC motor and solar BLDC pump controller in house.

What is Jain Irrigation & BLDC solar pump?

Jain Irrigation is largest company who has developed highly efficient permanent magnet Brushless DC motor, intelligent controller and data monitoring system. BLDC solar pump works in low radiance also. It starts early in morning and continues to work till late in the evening.

How does a BLDC water pump work?

The BLDC water pump adopts the DC 24V to drive the brushless DC motor. The brushless DC motor drives the impeller so that the liquid pressure can be increased to transmit the liquid. The AC micro-motor water pump realizes commutation via 50Hz frequency changes.
