# **Bangkok 300MWh Energy Storage Project**

## Overview

---

Does Thailand need a battery energy storage system?

Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The 2024 PDP draft included 10,000 MW of BESS, but this may see the country struggle to fulfil carbon neutrality and Net Zero commitments over the coming decades.

Where is the battery energy storage system (BESS) demonstration being conducted?

The project is being conducted within the BESS area newly established on the premises of Siam Toyota Manufacturing (STM) in Thailand. Executives from TMC, TMA, and SCG, in collaboration with partner companies, celebrate the launch of the Battery Energy Storage System (BESS) demonstration in Thailand.

How many mw can a solar generator store in Thailand?

Their total combined storage capacity was 994 MW. Interestingly, this allowed generators to sign semi-firm power purchase agreements (PPAs) with the Electricity Generating Authority of Thailand (EGAT) with minimum availability guarantees. Many solar projects in Thailand have non-firm PPAs in place due to a lack of storage on site.

What is the future of energy storage in Asia?

The peak is projected to grow to 56.1GW by 2037, while renewable energy's share of the electricity generation mix will increase to 51%. Energy-Storage.news' publisher Solar Media will host the 2nd Energy Storage Summit Asia next week, 9-10 July 2024 in Singapore.
