# **Base station battery replacement**

## Overview

---

Do I need to replace my base station's batteries?

If you're not certain which system you have, see the [Which Version of the SimpliSafe® System Do I Have](#) article. You will likely never need to replace your Base Station's batteries as they are rechargeable and meant to last. The Base Station takes four (4) 1.2V, 1300mAh nickel-metal hydride (NiMH) rechargeable batteries.

How many batteries does the base station take?

The Base Station takes four (4) 1.2V, 1300mAh nickel-metal hydride (NiMH) rechargeable batteries. Regular alkaline batteries should never be inserted into the Base Station, as they may damage the device. Once you have acquired the necessary NiMH rechargeable batteries, you can follow the steps below to replace them.:

How do you remove a battery from a base station?

To safely remove the battery from your SimpliSafe base station, you'll need a small Phillips head screwdriver. This tool will allow you to unscrew the securing screw that fastens the battery compartment cover in place.

How to remove a battery from a SimpliSafe base station?

To remove the battery from your SimpliSafe base station, first locate the battery compartment on the bottom of the base station.
