Base station outdoor grounding bar specifications

Overview

Does Storm offer grounding bar kits?

Storm offers grounding bar kits that come with a voltage-matched set of standoff insulators and heavy stainless steel brackets for rack and wall mounts. They offer over 90 different variations of UL Listed ground bar kits with different bar sizes, hole sizes, and lug configurations.

What are Erico grounding bars?

These grounding bars provide a convenient, reliable grounding location. Their quarter-inch thick solid-copper bar represents the ultimate in ground connections. ERICO grounding bars include insulators, stainless steel brackets, stainless steel mounting bolts, and are UL Listed.

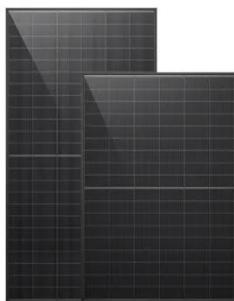

What is a grounding bar?

A bar used in a terminal box or other electrical connections to ground a number of contacts together. A rod used in the earth to supply a grounding point. All products with ANY of the selected attributes will be returned as matches.

Where should a grounding bar be mounted?

This places the inside of the ground bar more than 2-1/2 inches from the mounting surface. There's plenty of room to work after mounting the bar. These bars may be mounted horizontally or vertically and the mounting holes in the copper bar are 8-7/8 in. on center. These grounding bars provide a convenient, reliable grounding location.
