# **Base stations of South Asian operators**

## Overview

---

How many 5G base stations are there in China?

At the end of 2023, operators had installed 3.4 million 5G base stations, accounting for more than 30% of China's total mobile base stations.<sup>1</sup> Data from the Chinese telecoms regulator also shows that more than 80% of administrative villages have 5G connectivity.<sup>2</sup> Innovative solutions may be needed to extend 5G coverage to hard-to-reach areas.

How many base stations are needed in South Korea?

Operators in South Korea were required to have 22,500 base stations by the end of 2021, 45,000 by the end of 2023, and 150,000 base stations upon completion of their 3.5 GHz spectrum rollout. Additionally, within three years, there were required to install 15,000 base stations utilizing 28 GHz.

Which region will dominate the base station market?

Regionally, Asia Pacific is expected to dominate the base station market during the forecast period. This dominance is attributed to the rapid urbanization and industrialization in countries like China and India, coupled with significant investments in 5G infrastructure.

What are the opportunities for the base station market?

The base station market presents numerous opportunities for growth and innovation. One of the primary opportunities lies in the deployment of 5G networks. The transition to 5G is driving significant investments in new infrastructure, including base stations.
