# **Battery Management System**

## **BMS Industry**

## Overview

---

What is the market size of battery management system (BMS)?

The battery management system (BMS) market is projected to rise from USD 10.2 billion in 2025 to USD 23.3 billion by 2035, growing at a CAGR of 8.6%. Lithium-ion BMS will capture 44% of market value in 2025 due to widespread use in EVs, storage systems, and electronics. The automotive sector alone will expand at 7.4% CAGR.

What drives the global battery management system (BMS) market?

Between 2020 and 2025, the global battery management system (BMS) market experienced considerable growth. While EV adoption became a major driver, another factor propelling BMS demand was the growth of renewable energy projects.

What is a battery management system (BMS)?

For instance, BMS enables remote monitoring and control of battery performance, which is essential for applications such as energy storage systems and electric vehicles. This feature allows operators to monitor battery status, identify potential issues, and adjust remotely, improving overall efficiency and reducing maintenance costs.

How much is the battery management system market worth?

The global Battery Management System Market in terms of revenue was estimated to be worth \$9.1 billion in 2024 and is poised to reach \$22.0 billion by 2029, growing at a CAGR of 19.3%.

### Battery Management System (BMS) Market

Safety Concerns Regarding Li-Ion Battery Systems  
Growing Electric Vehicle Adoption  
Rising Integration of Renewable Energy Sources  
Increasing Demand For Consumer Electronics  
The increasing safety concerns surrounding lithium-ion batteries have become a critical driver for the battery management system (BMS) market. Recent incidents have highlighted the crucial need for sophisticated monitoring and protection systems, particularly as these batteries are susceptible to high temperatures and are inherently flammable.
