Battery cabinet replacement regulations

Overview

What are the removability and replaceability requirements for portable batteries?

Removability and replaceability requirements apply from 18 February 2027. When placed on the EU market, products incorporating portable batteries shall come with instructions and safety information on the use, removal and replacement of the batteries. This information shall be made available permanently online, on a publicly available website.

Are You Ready for the EU batteries regulation's removable and repairability requirements?

Are you ready for the EU Batteries Regulation's Removability and Repairability Requirements?

The European Union Batteries Regulation 2023/1542 (the EU Batteries Regulation), which entered into force on 17 August 2023, requires that portable batteries incorporated into products that are placed on the EU market must be removable and replaceable.

What is Article 11 of the batteries regulation?

Article 11 of the Batteries Regulation focuses specifically on removability and replaceability requirements of portable batteries and batteries of light means of transport (LMT). This article will enter into force in February 2027, and in the meantime the EU Commission has worked on guidelines for its application.

What are EU rules on batteries?

EU rules on batteries aim to make batteries sustainable throughout their entire life cycle – from the sourcing of materials to their collection, recycling and repurposing.
