Battery energy storage related majors

Overview

What is a Master's in battery technology & energy storage?

With a basis in the chemistry of batteries, the Master's Programme in Battery Technology and Energy Storage is designed for students that are aiming for broad knowledge within the function and use of batteries to support the transformation toward a more sustainable and resilient society.

What is a master's degree in battery materials & technology?

The English-taught Master's degree programme "Battery Materials and Technology" will prepare its students for these future challenges. It addresses central issues of energy storage in an interdisciplinary manner, and focusses questions like efficiency and safety of new battery materials within a scientific orientation.

What is a battery Science & Technology in engineering?

Research-driven. M. Sc. Battery Science and Technology in Engineering! The interdisciplinary degree program in Battery Science and Technology in Engineering equips students with the essential knowledge and skills to explore potential applications, engage in research, and contribute to the advancement of battery technology.

What can you do with a master's degree in battery technology?

The interdisciplinary Master's degree programme provides students with the necessary battery know-how of the entire value chain: from the electrode and separator materials to the battery pack in the e-car.
