Battery pack power supply

Overview

What is a rechargeable battery pack?

This portable rechargeable battery pack consists of a 60 watt hour lithium ion battery assembly and two DC/DC converters. The first DC converter allows the pack to be charged with a wide range of voltage inputs. The second allows the pack to deliver a user settable voltage to run equipment requiring 5volts to 19+volts.

How many volts can a battery pack charge?

The charger section of the battery pack has a DC/DC converter with a wide input range. This means that the pack can be charged from a wide variety of sources. The input voltage for charging can be as low as 5 volts and as high as 24 volts.

Does a battery pack put out 5V?

Yes, it puts out 5V no matter what the main output voltage is set to, essentially turning the pack in to a 2-voltage source. There is an audio alarm that sounds when the battery is close to being empty. It sounds when the battery is 3% to 5% full and will sound until the battery shuts off.

What voltage is a ups power supply?

It can also act as a variable voltage UPS power supply. Outputs at 5V , 5.5V , 6V , 6.5V , 7.5V , 8.4V , 9V , 10V , 11V , 12V , 13V , 14V , 15V , 16V , 18V , or 19V. It can also be charged with voltages as low as 9 volts and as high as 24VDC.
