Berne Solar Street Lights

Overview

What is a solar street light?

A solar street light is a raised lighting system powered by a photovoltaic (PV) module charging a battery that runs an LED luminaire at night. Modern systems are off-grid, smart-controlled, and designed to operate through low-sun periods. Pole/brackets & wiring, optional sensors/remote monitoring.

Are solar streetlights environmentally friendly?

If you are looking for an environmentally friendly light source for the street, nothing can beat solar streetlights. These lights save electricity and play a role in minimizing the effect of global warming. Solar streetlights get power from sunlight.

Who makes solar streetlights?

Sokoyo started its journey as a solar streetlights manufacturer and distributor in 2008. It is one of the top solar streetlights companies and supplies the lights in Africa, Australia, Asia, and 70 other countries. This company provides two types of solar streetlights: split type and gel battery solar streetlights.

How do I choose the best solar street light?

This guide breaks down key factors like lumens, battery capacity, solar panel type, and installation requirements to help distributors, wholesalers, traders, and retailers choose high-quality products. To choose the best solar street light, consider lumens per watt efficiency, battery capacity, solar panel quality, and installation environment.
