Overview

Could a new energy storage scheme help the UK achieve energy independence?

The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure. This could see the first significant long duration electricity storage (LDES) facilities in nearly 4 decades, helping to create back up renewable power and bolster the UK's energy security.

What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.

Could long duration electricity storage be the UK's first energy storage facility?

This could see the first significant long duration electricity storage (LDES) facilities in nearly 4 decades, helping to create back up renewable power and bolster the UK's energy security. These technologies work like giant batteries by storing renewable energy and releasing it onto the grid and into homes when needed.

Is the £50 billion CCS subsidy a tip of the iceberg?

“Given the technical immaturity of CCS and its track record of cost overruns, this £50 billion subsidy amount is likely the tip of the iceberg,” said Andrew Reid, an IEEFA energy finance analyst and author of the report. “The government has failed to assess the full financial impact of CCS support on taxpayers.

British Energy Storage Cabinet Subsidy Policy

UK faces bottomless pit of carbon capture and storage subsidies

The UK has earmarked more than £50 billion of subsidies to support carbon capture and storage (CCS) projects that together only account for 8% of the country's 2050 CCS target.
