Broken solar glass

Overview

What happens if a solar panel is broken?

Common causes of solar panel damage are falling objects, thermal stress, and micro-cracks and scratches. A broken solar panel may continue to work, albeit at a reduced efficiency. Broken solar panels pose a serious fire and safety risk and must be removed and replaced. Some companies can fix broken solar panels, but this is costly.

What causes glass breakages in solar panels?

From pv magazine 6/25 Clean Energy Associates has investigated glass breakages at utility-scale solar sites across three continents. It has found that there isn't a single root cause, but a perfect storm: thinner glass combined with design shortcuts, evolving materials, and field realities that stress modules beyond what was simulated in the lab.
