Burundi Energy Storage Power Plant

Overview

Burundi's first grid-scale lithium-ion storage system (20MW/80MWh) came online in Q1 2025, stabilizing voltage for 400,000 households. These aren't just oversized phone batteries – we're talking about: Why should Burundi invest in a large-scale energy infrastructure?

Located in Bururi province, this large-scale infrastructure marks a key step forward in the country's pursuit of energy self-sufficiency. It is also a strong signal for an investment-friendly climate to ensure more inclusive and sustainable economic development for Burundi.

Why is the Jiji hydroelectric power plant important in Burundi?

World Bank Representative in Burundi Hawa Cisse Wagué added that: “The Jiji hydroelectric power plant and the lines and substations built as part of the project are not infrastructure like any other. This infrastructure helps ensure Burundi's economic and social development.

How much does it cost to build a new plant in Burundi?

The construction of these two plants at a total cost of \$320 million was made possible thanks to strong cooperation between the Burundi government and the development partners – the African Development Bank (AfDB), the European Investment Bank (EIB), the World Bank (WB) and the European Union (EU).

How much energy will the mulembwe plant provide?

With the Mulembwe plant to be completed in the coming months, the two plants will have an installed capacity of 49.5 megawatts and estimated annual production of 235 gigawatt hours of clean energy. They will provide electricity to 15 000 households, 7 000 businesses and 1 700 industrial facilities.
