What can I bring to a solar-operated device?

What can I bring?

Solar-operated items use built-in panels to convert sunlight into electricity. If your device includes a built-in lithium battery: Ensure the battery is properly installed in the device. Spare batteries must be individually protected—use original packaging, tape over terminals, or a protective case to prevent short-circuiting.

How to pack a solar generator?

To comply with these guidelines, it is advisable to pack your solar generator in a way that allows easy removal from your bag, similar to how laptops are handled during security screenings. Additionally, ensure that cables or attachments are properly organized and secured to avoid tangling or confusion during inspection.
