# **Can solar panels be installed on Serbian tile roofs**

## Overview

---

Can solar panels be installed on a tiled roof?

Be the first to leave a review. Solar panels can be installed on many roof types and the most common type in Australia are tiled roofs. The tiles are removed and stainless steel brackets are screwed to the rafters and the tiles then re-installed in the former position.

How do I mount solar panels to my roof?

Here are some mounting solutions: Tile hooks: Tile hooks provide a direct attachment method for securing solar panels to the roof by affixing them to the roof tiles. This method is commonly employed on clay tile roofs— requiring the installation of specialized hooks attached directly to the tiles.

How do I install solar panels on a lightweight tile roof?

The best way to install solar panels on a lightweight tile roof is through a method called inset solar installation, also known as a “comp-out” installation. This technique removes the section of tile where the solar panels will be installed and replaces it with composite shingles before mounting the solar array.

Should you install composite shingles under solar panels?

By removing tiles and installing composite shingles underneath the solar panels, this method eliminates the risk of cracking tiles during installation or in the future. It also prevents damage to the underlayment, which is critical for waterproofing.
