Canberra energy storage cabinet battery project tender

Overview

What is Australia's biggest energy tender?

Australia's biggest tender delivers 15 GWh of battery energy storage systems, boosting grid reliability and advancing the 2030 renewable target.

What is the largest battery energy storage tender?

Executive summary: The third CIS tender awarded 4.13 GW of contracts to battery energy storage projects across the mainland NEM. This marks the largest battery tender to date. The tender locked in 15.37 GWh of energy storage capacity. This tops the previous record of 13.8 GWh set by the LTESA long-duration energy storage tenders.

What is the Big Canberra battery project?

Installation is underway on behind-the-meter batteries at nine sites. The Big Canberra Battery project will deliver an ecosystem of batteries across the ACT to ensure that our electricity grid remains stable. The Big Canberra Battery project includes the installation of: installation of behind-the-meter batteries at nine government sites.

Will a big battery power Canberra?

The government said the big battery project will be capable of responding rapidly to network constraints and will be able to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods. The Williamsdale battery will be developed, built and operated by Macquarie Group offshoot Eku Energy.
