# **Chad Solar Container Long-Term Payment Method**

## Overview

---

Why should we invest in solar power in Chad?

It is an opportunity to improve energy access in Chad by developing its natural solar potential. Moreover, the Project will set a precedent for PPPs in the country and create an opportunity for replication for other solar power projects on the Sahel region in the framework of the Desert to Power Initiative.

What is the Chad energy project?

The Project will help build sustainability in the electricity sector in Chad by reducing production costs; will increase installed capacity in the country and contribute 10% of the energy supplied to the interconnected system (the equivalent of 25,000 customers).

What does Djermaya solar mean for Chad?

The proposed project concerns a EUR 18 million loan as well as a Partial Risk Guarantee (GPR), for the establishment of the Djermaya solar power plant in Chad. Djermaya Solar is a key building block of the Desert to Power Initiative and is of high strategic importance for Chad.

How is Lamadji power project funded?

The interconnection infrastructure includes an 18 km 33kV aerial double-circuit transmission line, two 33/90kV step-up transformers at the Lamadji substation, and an 8MW battery stabilization system. The project is structured as an Independent Power Producer (IPP) and will be funded primarily through private investment.
