Overview

Where to buy solar inverter?

Inverter.com online store provides a complete range of solar inverters for your photovoltaic system including on grid inverter (grid tie inverter), off grid inverter, micro inverter and solar pump inverter with lower cost. Choose inverter.com to buy your solar inverter benefit from the superior quality, best price and flexible delivery.

Which solar inverter is best?

Each inverter can accept more PV power than its rated power output, and can be connected to virtually any battery on the market. The Sol-Ark 5K inverter is best for small off-grid setups, the 8K inverter is likely the best choice for a residential on-grid installation, and the 12K is the best option for a full-sized off-grid home setup.

What is a solar inverter?

A solar inverter or photovoltaic (PV) inverter is a type of power inverter that converts the variable direct current (DC) output of a photovoltaic solar panel into a utility frequency alternating current (AC) that can be fed into a commercial electrical grid or used by a local, off-grid electrical network.

What is the smallest solar inverter?

The 5K is Sol-Ark's smallest inverter, and is mainly meant for small off-grid applications. It supports up to 6,500W of DC solar input (3,250 for each of its MPPT charge controllers), and up to 9,600W of AC input from microinverters or a separate solar string inverter. It also allows for a backup generator to charge the battery bank.
