## Overview

---

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

Do communication base station operations increase electricity consumption in China?

Comparing data from 2021, 2025, and 2030, <sup>41</sup> we found that the electricity consumption due to communication base station operations in China increased annually.

How many telecom base stations are there in China in 2024?

In 2024, the number of telecom base stations in China is expected to increase to 12.65 million. Based on this, we estimate that the total electricity consumption of telecom base stations in China in 2024 will be 146,242.621 GWh.

Should China upgrade to low-carbon base stations?

These outcomes demonstrate that upgrading to low-carbon base stations not only ensures economic feasibility but also delivers significant environmental and public health benefits, reinforcing the strategic value of decarbonizing China's communication infrastructure.

## China's communication infrastructure base station

---

### China reports 4.7 mln 5G base stations by end of September

There were about 4.71 million 5G base stations in China by the end of September, amid the country's efforts to strengthen its cyber infrastructure.

### China to construct over 4.5 million 5G base ...

China ended 2024 with over 4.19 million 5G base stations. China plans to construct over 4.5 million 5G base stations in 2025 while ...

### China builds world's largest 5G network with 4.7 million base stations

China had about 4.71 million 5G base stations by the end of September, amid its efforts to strengthen its cyber infrastructure. Over the last five years, China has built the ...

## mobile communication base stations

China's mobile communication base station market is poised for significant growth, driven by the rapid expansion of 5G technology and the ...

### China home to 4.4 mln 5G base stations: ministry-Xinhua

The State Council Information Office holds a press conference on development of industry and information technology in the first quarter of 2025 in Beijing, capital of China, April ...

## Low-carbon upgrading to China's communications base stations ...

As China rapidly expands its digital infrastructure, the energy consumed by communication base stations has grown dramatically. Traditionally powered by coal ...

### China sees strong growth in 5G base stations

China witnessed substantial growth in the number of 5G base stations this

year, according to the latest data from the Ministry of Industry and Information Technology. As of the ...

---

### **mobile communication base stations**

China's mobile communication base station market is poised for significant growth, driven by the rapid expansion of 5G technology and the increasing demand for high-speed internet ...

### **China home to 4.4m 5G base stations: ministry**
