# Columbia Chemical Park Energy Storage Project

**LPSB48V400H**  
**48V or 51.2V**

## Overview

---

Who is developing the Columbia Energy Storage Project?

Development of the Columbia Energy Storage Project is led by Alliant Energy in partnership with Wisconsin Public Service Corporation, a subsidiary of WEC Energy Group, and Madison Gas and Electric.

What is Alliant Energy's Columbia Energy Storage Project?

Alliant Energy's revolutionary Columbia Energy Storage Project, using Energy Dome's safe, reliable CO<sub>2</sub> battery, represents a significant advancement in energy storage while bolstering the power grid to benefit Wisconsin customers.

Where will a new energy storage system be built?

The energy storage system will be built south of Portage, Wisconsin in the town of Pacific and near Alliant Energy's existing Columbia Energy Center. Construction is expected to begin in 2026 and be completed by the end of 2027.

How can energy storage be used to decarbonize the electrical grid?

Renewable energy is limited by its intermittency, as its supply may fluctuate based on weather and location. Innovative energy storage technologies are required to decarbonize the electrical grid with stability. Both batteries and dense energy carriers have attracted vast research efforts as options for large-scale energy storage.
