Combiner box inverter price

Overview

What is a 'combiner box' in a solar PV system?

A "Combiner Box" in the context of a solar PV system is to combine the output of several solar strings together. When a solar power system consists of more than one "string", each input string is connected to a fuse terminal.

What is an AC combiner box for PV inverter?

An AC combiner box is used to connect multiple grid-connected inverters to a single power cabinet. It provides lightning protection and circuit breakers for each inverter output, ensuring safe and convenient access to the power cabinet.

What is a combiner box?

Our combiner box is waterproof, dustproof and anti-corrosion, resisting harsh conditions for long-term and uninterrupted use. We offer multiple strings input up to 24 solar strings, with a maximum of 30 A per string. Series Isolator Switches with a max voltage up to 1500V DC widely meet various demands from PV power systems.

What is a DC combiner box?

DC combiner boxes link PV inverters and PV arrays, combining the output of a large number of strings to improve PV performance. Through the design of our combiner box, we enable easy integration of additional functions, such as the inclusion of switches and a second MPPT.
