# **Comparison of a 40-foot Lobamba folding container with a traditional generator**

## Overview

---

What is a containerized generator?

**Less Maintenance** The Containerized Series generator sets are designed for harsh weather and strict acoustical standards, utilizing a standard 40' high cube container equipped with an array of innovative features, allowing the system to operate reliably even in the hottest environments – validated at ambient temperatures of up to 55 degrees Celsius.

How many pallets can a 40 foot shipping container hold?

In contrast, a 40-foot shipping container can carry between 23 to 24 pallets. Regarding American standard pallets, a 20-foot shipping container can hold 10 to 11 pallets in one tier. And a 40-foot container can fit between 20 to 21 pallets on the base.

What type of generator is used for refrigerated shipping containers?

- **Diesel generators:** Diesel generators are the most common type of generator used for refrigerated shipping containers. They are reliable, durable, and can provide a lot of power. However, diesel generators can be noisy and expensive to operate.

How to choose a generator for a refrigerated shipping container?

Diesel, gasoline, and natural gas are good options. Generators can be really loud, so picking one with a low noise level is key. This is even more important if the generator is going to be used in your neighborhood. If you need to move your refrigerated shipping container around, it's best to go for a generator that comes with wheels.
