# **Construction of the solar container communication station flywheel energy storage project**

## Overview

---

What is the largest flywheel energy storage system in the world?

Image: Shenzhen Energy Group. A project in China, claimed as the largest flywheel energy storage system in the world, has been connected to the grid. The first flywheel unit of the Dinglun Flywheel Energy Storage Power Station in Changzhi City, Shanxi Province, was connected by project owner Shenzhen Energy Group recently.

What is the Dinglun flywheel energy storage power station?

The Dinglun Flywheel Energy Storage Power Station, the World's Largest Flywheel Energy Storage Project, represents a significant step forward in sustainable energy. Its role in grid frequency regulation and support for renewable energy will help stabilize power systems as China continues to increase its reliance on wind and solar energy.

What is China's first grid-level flywheel energy storage frequency regulation power station?

This project represents China's first grid-level flywheel energy storage frequency regulation power station and is a key project in Shanxi Province, serving as one of the initial pilot demonstration projects for "new energy + energy storage".

Who financed China's largest flywheel energy storage system?

The project was developed and financed by Shenzhen Energy Group. Image: Shenzhen Energy Group. A project in China, claimed as the largest flywheel energy storage system in the world, has been connected to the grid.
