Costa Rica frequency isolation 120kw inverter

Overview

What are CSI solar inverters?

CSI Solar's grid-tied, transformer-less string inverters help to accelerate the use of three-phase string architecture for industrial and commercial rooftop applications. 200-1000 VDC, and 6 or 9 MPPTs for maximum energy harvest. For detail information, please refer to Installation Manual.

How long does a solar inverter last?

A: Yes, 18 months for inverter and inverter-related products including solar generators, and solar inverters, 2 years for three-phase inverter and MPPT controller, 10 years for solar panels, and 2 years for solar lights. Inverter is a necessary unit for the off-grid power system or backup power system.

What type of inverter does mile solar offer?

MILE SOLAR provides 10KW - 200KW three phase inverters for your needs. Efficiency: Look for an inverter with high efficiency to maximize the utilization of your energy storage. Higher efficiency means less energy loss during the conversion process, resulting in better overall system performance and reduced operating costs.
