In AliExpress, you can also find other good deals on inverter!.

How can a DC/AC inverter double the output power?

Output power can be doubled by using the inverter. Communication between the two DC/AC inverters synchronizes the phase relation in both operating modes. To create a 3-phase grid, three inverters are connected in parallel. The three DC/AC inverters can communicate with each other, thereby synchronizing the 120° phase shift in real time.
