Delivery Time of High-Pressure Folding Containers for Data Centers

Overview

What is a modular data center container?

IT containers based on the modular principle. Modular data centers in containers are the perfect, scalable solution – whether individually for SME, cloud and Edge applications, or as preconfigured data center containers. Growing data volumes and escalating requirements often lead to space problems in existing IT environments.

Are container solutions suitable for outdoor sitting a big data application?

Growing data volumes and escalating requirements often lead to space problems in existing IT environments. Container solutions suitable for outdoor siting are one possible solution for this kind of Big data applications.

What is a seafold 40 HC container?

SeaFold 40' has the same features as a conventional 40' HC container. Requires no special handling or maintenance equipment. Safe and easy folding and erecting procedure. Compatible with all standard lift equipment found in most ports and terminals. Serviceable by existing maintenance organizations and depots throughout the world.

How long does it take to build a datacenter?

A traditional datacentre takes 18 to 24 months to build. With the fully modularized design concept, Delta's containerized datacenter is flexible and scalable with only a few weeks or months for deployment to meet the rapidly growing IT needs. Highly integrated. Highly reliable.
