# **Delivery time of 60kW photovoltaic container for oil platform**

## Overview

---

How long does it take to ship a solar container?

Standard solar container models can be manufactured and ready to ship in as little as 4-6 weeks. Customized configurations can take up to 8-10 weeks, with shipping times varying by destination. Do you offer after-sales support for mobile solar PV containers?

Can heavy solar equipment be delivered in a shipping container?

Heavy solar equipment can't always be delivered in a standard shipping van or shipping container, it's at risk of being damaged during transit, and it needs to arrive onsite according to energy project timelines. Effective supply chain management requires top-notch renewable energy logistics.

How long does it take to install a solar panel container?

Unlike standard solar panel containers, LZY's mobile unit features a retractable solar panel unit for quick installation. Folding solar panel inside the container can be unfolded or stowed in as little as 1h ( the time does not vary for different photovoltaic containers ).

Why should you choose LZY solar panels on shipping container?

Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability. Sensitive solar arrays can be effectively protected from storms, vandalism and all possible threats. What is LZY's mobile solar container?
