Democratic Congo Energy Storage Power Supply Quote

Overview

How does the Democratic Republic of the Congo support the economy?

In the AC, Democratic Republic of the Congo supports an economy six-times larger than today's with only 35% more energy by diversifying its energy mix away from one that is 95% dependent on bioenergy.

Could the Congo become an electricity exporter?

Almost all electricity generation today comes from hydropower and the Inga project has the potential to provide much more. If network constraints are addressed, Democratic Republic of the Congo could become an electricity exporter.

What is the government's vision for power generation in Congo?

The government's vision is to increase the service level to 32 percent by 2030. Lack of access to modern electricity services impairs the health, education, and income-generating potential of millions of Congolese people. Most power generation development is directed and funded by mining companies seeking to power their facilities.

How much power does the DRC have?

The source, the ARE's annual report, the DRC's power output rose by 9.8% from 2020 to 2024. Despite this progress, the DRC's total electricity output remains remarkably low, reaching just 13.6 terawatt-hours (TWh) in 2024.
