Is solar power a viable energy source for Bangladesh?

Solar power, in this regard, is a reliable, economically feasible and secured energy source for the country . Most of the people in Bangladesh live in the rural areas where power supply is in high demand. Solar power has great potential to be a key electric source for the country in the future.

How much electricity does Bangladesh have?

In rural Bangladesh, which is home to almost 62% of the population, around 45% of people have access to electric power. The primary driver of global electricity production is heavily dependent on finite fossil fuels supplemented by nuclear power, hydroelectric power, and a variety of renewable energy sources including solar and wind.
