Disable the base station and still be able to communicate

Overview

Should a removable base station be activated or deactivated?

For wireless communication networks (WCNs) with the removable base station (BS), activating the removable BS could improve the quality of service (QoS), while frequent activating and deactivating may incur huge costs.

Can I assign a handheld to a primary base station?

Yea, you must assign at least one Handheld to the primary base station. Now its ok. Thank you and BR. Was this reply helpful?

Yes No An Unexpected Error has occurred. Solved: I have 5 Poly Rove B4 Base stations and 41 Poly Rove 30 handhelds.

Do I need a voice service registered on a rove B4 base station?

You must have a voice service registered on only one of the Rove B4 base stations. The base station with the registered service acts as the primary base station. > source < Do you see the base stations you declared the master and the secondary in the Base Station Groups Status summary?

Can you see the DECT Chain?

.

Does a BS switch to standby mode if no data packet is transmitted?

If there is no data packet to be transmitted, BSs will switch to standby mode. However, for the removable BS, a prolonged standby period results in resource waste. Therefore, it is essential for managers to monitor the standby status of BSs. We also adopt probabilities to describe the standby situations of the two BSs.

Disable the base station and still be able to communicate

command and solution of RTKNAVI (Rover) and STRSVR (Base Station...

I'm not using these tools, but I'd assume you want to enable the RTCM3 messages out of the USB VCP of the Base C94-M8P, and suppress the UBX and NMEA output, and ...
