# Does New Delhi Energy have energy storage projects

- ✓ High energy density and long cycle life
- ✓ Modular structure

No need to replace the battery

Shorter charging time

Meets 99% EV car

## Overview

---

Is India's first regulated utility-scale battery energy storage system online?

India's first commercial regulated utility-scale battery energy storage system (BESS) is now online. The 20MW/40MWh standalone system, developed by IndiGrid, was commissioned in Delhi on April 4.

Will India get 5GW of energy storage by 2027?

This is also the first project under GEAPP's BESS Consortium, which was launched at COP28 to deploy 5GW of energy storage in low- and middle-income countries, including 1GW in India by 2027. IndiGrid, backed by KKR and Sterlite Power, sees this project as a replicable model and a key step in supporting India's energy transition.

Why should India invest in a Bess storage facility?

With a significant increase in renewable energy generation capacity, it is imperative that storage facilities are developed to help India and the world transition to clean energy. With an annual tariff nearly 55% lower than the previous benchmark, the project sets a new standard for BESS affordability in India.

How ESS will impact India's energy transition?

Technologies such as PHS and gravity storage. Standalone ESS will play a pivotal role in India's energy transition by enhancing grid flexibility and security. Its ability to provide freedom in end-use applications while reducing risks for technology providers makes it a cornerstone of the
