## Overview

---

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

What is the EU battery storage action plan?

To support this critical technology's expansion, a comprehensive EU Battery Storage Action Plan is needed, aiming to streamline permits, enhance supply chains, and meet ambitious deployment targets. Battery storage is the fastest-growing energy technology worldwide and is set to define the trajectory of the energy transformation going forward.

How long will battery storage last in Europe?

The European market for battery storage showed a remarkable expansion, achieving a 15% growth in 2024 alone. This growth is commendable, but it's slower than in past years. This raises important questions about how long it can last. Forecasts predict a significant growth in installations by 2025.

How much battery storage will Europe have in 2025?

In the most-likely scenario for 2025, 29.7 GWh of battery storage will be installed in Europe, representing a 36% annual growth. By 2029, the report anticipates a sixfold increase to nearly 120 GWh, driving total capacity to 400 GWh (EU-27: 334 GWh).

## EU battery storage plans

---

### **SolarPower Europe Calls for Battery Storage Action Plan**

Based on own market research, SolarPower Europe has called on the European Commission to develop a special action plan for battery storage.

---

### **Europe's Battery Storage Hits 21.9 GWh Amid ...**

Europe's battery storage grew 15% in 2024, but a slowdown looms. Experts urge an EU Action Plan to meet clean energy goals.

### **It's high time for an EU Battery Storage Action Plan**

Global deployment of battery energy storage systems (BESS) is accelerating at an unprecedented pace - with world installations projected to expand swiftly in the coming years. ...

## EU Battery Strategy

The EU Battery Strategy is a strategic imperative for several reasons, including economic growth, reducing technological dependence ...

## Europe's Battery Storage Hits 21.9 GWh Amid Policy Demands

Europe's battery storage grew 15% in 2024, but a slowdown looms. Experts urge an EU Action Plan to meet clean energy goals.

## New report: European battery storage grows 15% in 2024, EU ...

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing ...

## EU Battery Storage Action Plan Is Urgently ...

Battery storage is rapidly becoming a key component in the global energy

transition, with investments soaring from \$1 billion in 2015 ...

---

### **EU Battery Storage Action Plan Is Urgently Needed**

Battery storage is rapidly becoming a key component in the global energy transition, with investments soaring from \$1 billion in 2015 to nearly \$70 billion today. The ...

---

### **New report: "EU energy storage action plan needed"**

We urge the European Commission to double-down on their efforts here and come forward with an EU Energy Storage Action Plan as part of a broader Energy System ...

---

### **Powering the EU's future: Strengthening the battery ...**

The European Battery Alliance points to the importance of including several key

focus areas in an action plan for the 2024-2030 period aimed at strengthening the European ...

### **New report: "EU energy storage action plan ...**

We urge the European Commission to double-down on their efforts here and come forward with an EU Energy Storage Action Plan as ...

### **It's high time for an EU Battery Storage Action ...**

Global deployment of battery energy storage systems (BESS) is accelerating at an unprecedented pace - with world installations ...

### **EU Battery Strategy**

The EU Battery Strategy is a strategic imperative for several reasons, including economic growth, reducing technological

dependence and ensuring European sovereignty, as ...

## European battery storage installations to ...

European battery storage installations set a new record in 2024 with 21.9 GWh added, bringing total capacity to 61.1 GWh despite a ...

## European battery storage fleet expected to grow 45% year ...

3 hours ago Germany continues to lead Europe's battery energy storage market, with 18 GW of utility-scale demand and 8 GW from commercial and industrial applications over the next decade.

## European battery storage installations to grow 36% in 2025, ...

European battery storage installations

set a new record in 2024 with 21.9 GWh added, bringing total capacity to 61.1 GWh despite a slowdown in growth to 15 percent after ...
