Where does SSE Renewables operate?

SSE Renewables operates across the United Kingdom, Ireland, Continental Europe, and Japan. ENGIE UK is a utility company and Independent Power Producer (IPP) specializing in renewable energy generation, flexible energy storage, and energy supply solutions for businesses.

Is there a market for large-scale battery storage in Central Europe?

In many countries in Central Europe, the market for large-scale battery storage is growing rapidly. The drivers are diverse, but there are still obstacles, as Eliza Stefan, Sales Manager BESS for Central & Eastern Europe, Jinko EES, points out.

How can Europe increase the share of renewables in its energy mix?

Despite this impressive achievement, Europe continues to set ambitious targets to further increase the share of renewables in its energy mix. Launched in 2022, the REPowerEU plan outlines bold goals for 2030. To meet these targets, the EU is creating supportive frameworks for renewable energy through policies, regulations, and investment.

How does Poland support large-scale battery storage?

Poland is also relying on capacity market auctions, but also on tax incentives, to promote large-scale battery storage. Up to 45% of project costs of utility-scale storage are covered by grants in Hungary, in addition to a CfD scheme and modern grid connection rules.
